DETAILED ACTION

Information Disclosure Statement

The information disclosure statements (IDS) submitted on 12/21/2004 and

02/16/2005 were filed after the mailing date of the first Office Action on 09/23/2004.

The submission is in compliance with the provisions of 37 CFR 1.97. Accordingly, the

information disclosure statement is being considered by the examiner.

EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes

and/or additions be unacceptable to applicant, an amendment may be filed as provided

by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be

submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview

with applicants' attorney, Stuart B. Shapiro, on 05/05/2005.

The claims has been amended as follow:

On page 8, line 14, at claim 26 of the Amendment filed 02/16/2005

ADD *computer* after "*a*" and before "*program storage device readable by a*

machine".

On page 10, line 15, at claim 36 of the Amendment filed 02/16/2005

ADD *computer* after "*a*" and before "*program storage device readable by a*

machine".

On page 13, line 10, at claim 48 of the Amendment filed 02/16/2005

ADD *computer* after "*a*" and before "*program storage device readable by a*

machine".

On page 14, line 11, at claim 49 of the Amendment filed 02/16/2005

ADD *computer* after "*a*" and before "*program storage device readable by a*

machine".

Allowable Subject Matter

The following is an examiner's statement of reasons for allowance:

The closet available prior arts, The McGraw-Hill Companies [Build a Book

Online, http://web.archive.org/web/19980513002459/http://mhhe.com/primis/ and

http://www.mhhe.com/primis/catalog/pcatalog/primisweb.ppt] combined with USP

6,073,148 (issued to Rowe et al.), and USP 6,611,840 (issued to Baer et al.) combined

with copending application 09/489,576 also teach a method and program for storing a

book. However, theses references fail to teach or suggest the step of

storing as a file object within the data repository a list of content entity identifiers indicating

the content entities within the content object, wherein a hierarchical arrangement of the content entity

identifiers within the list includes at least one hierarchical tier and at least one subordinate tier and

corresponds to a user-defined content object hierarchical structure, and wherein the content entity

identifiers are determined by the processing system and placed in the list in response to user selection

of the content entities for the content object, storing ones of the plurality of content entities within the

data repository as a plurality of individually accessible file objects, wherein each file object contains

one content entity, wherein the content entity identifiers each include identification information

identifying the file object containing the content entity associated with that identifier as in claims 1,

26 and 51;

storing as a file object within the data repository a hierarchical outline of containers and

content entity identifiers defining the content and corresponding to a user-defined hierarchy of the

content object, wherein each container represents an outline hierarchical tier and includes at least one

content entity identifier forming a subordinate outline hierarchical tier, and wherein the content entity

identifiers are determined by the processing system and placed in the outline in response to user

selection of content entities for the content object, storing ones of the plurality of content entities within

the data repository as a plurality of individually accessible file objects, wherein each file object

contains one content entity, and wherein the content entity identifiers each include identification

information identifying the file object containing the content entity associated with that identifier as in

claims 11, 36 and 61;

retrieving the file object containing the list of content entity identifiers, wherein a hierarchical

arrangement of the content entity identifiers within the list includes at least one hierarchical tier and at

least one subordinate tier and corresponds to a user-defined content object hierarchical structure, and

wherein each content entity is stored as an individually accessible file object within the data repository,

for each content entity identifier, retrieving the individually accessible file object corresponding to the

identified content entity, and inserting the content entity into the ordered list at the location of its

content entity identifier as in claims 23, 48 and 73;

enabling modification of the presence and position of content entity identifiers within said list

by a user to alter the content and structure of the content object, wherein a hierarchical arrangement

of the content entity identifiers within the list includes at least one hierarchical tier and at least one

subordinate tier and corresponds to a user-defined content object hierarchical structure, for each

content entity identifier, retrieving the individually accessible file object corresponding to the identified

content entity, and inserting the content entity into the ordered list at the location of its content entity identifier as in claims 24, 49 and 74.

Therefore, the invention is allowable over the prior arts of record for being directed to a combination of claimed elements including the providing steps as indicated above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
